

Front-end Developer

So, I want to be a Front-end Developer mainly because I would like to work Remotely, do a lot of problem solving (so that my work does not become repetitive and boring) not to mention Freelancing Opportunities it opens up for me

- Responsive Design
- HTML/CSS/JavaScript: CSS Preprocessor I know (SASS)
- Version Control (GitHub)
- Web Performance Optimization: image optimization (also lazy loading)
- Accessibility
- Cross-Browser Compatibility
- UI/UX Design Skills
- Personal Projects/ Collaborative Projects
- Client Testimonials

(Things I want to add but don't know how to)

- API Integration
- Package Managers
